

Total Economic Impact™ of Thales CipherTrust Data Security Platform

FORRESTER®

Thales commissioned Forrester Consulting to interview representatives from four global enterprises that have implemented the CipherTrust Platform to understand the potential benefits and ROI of our solution.

Reduced Impact of a Breach

“Within weeks of implementing CipherTrust Platform, we have been able to discover and protect over 50% of our data estate and achieve 100% centralization of key management thereby already reducing the impact of a breach.”

– Head of Enterprise Key Management & Cryptography, Financial Services

Study results over three years for a composite organization representative of interviewed customers.

Quantifiable Benefits of the CipherTrust Platform:

\$5.6M

Reduced impact of a breach

\$1.6M

Improved operational efficiency

\$992K

Avoided cost of tooling and storage

\$850K

Reduced cost of development

\$9.1M

Total benefits (risk-adjusted)

Automation and Simplified Management

“The level of automation and the simplified management console means we are able to free up capacity of our security analyst to do higher value-add tasks.”

– Head of Information Security Group, financial services

Unquantifiable Benefits of the CipherTrust Platform

Increased ability to meet compliance regulations

Flexibility to scale up and protect assets both on-premises and in cloud

Negligible depreciation of performance post encryption

Reduced Complexity and Cost

“If it wasn’t for the CipherTrust Platform, we’d have to invest in at least six different solutions and tools to cover all our use cases.”

– Head of Information Security Group, financial services
